The research presentation of “Impact of REITs on Asian Economies”, organized by Asia Pacific Real Estate Association (APREA) and sponsored by DTZ, was successfully held on 12th June 2014. Mr. Heiming Cheng, Director and Chief Executive of KaiLong Investment, attended the event. Mr. Mowen Ho, Executive Director (Fund Management) of KaiLong Investment, was invited to moderate the session. Mr. Ho is one of the China Chapter Board Members at APREA.

In the presentation, Ken Atchison, Managing Director of Atchison Consultants and Victor Yeung, Managing Partner and Chief Investment Officer of Admiral Investment Limited delivered their research results. It is widely felt that REITs have had a substantial impact on economies in Asia. Not just in terms of being a new asset class and their performance relative to other asset classes, but more broadly, in terms of social, economic and capital markets impacts.
